

Dear all,

Below some interesting news from ySIS!

### **YSIS 2018 Elections**

From November 20 to 26, 2017, we will have formal elections of ySIS to substitute two board members (Federico Camerlenghi and Giorgia Rocco). Each ySIS member can put himself/herself forward as a candidate. Don't be shy and **send us your nomination** by the end of October. Further information will come the next week.

### **StatTalk @ Padova (November 17, 2017)**

the fifth edition of the StaTalk series will be held at the Department of Statistical Sciences of the University of Padua, on November, 17, 2017. StaTalks are one-day workshops on statistical topics during which the hosting group introduces and overviews the main research interests of their members. Aimed at Master's and PhD students, as well as at post-docs and young researchers, StaTalks are intended to be informal gatherings which allow for a more proficient interaction between presenters and participants. They typically feature some introductory tutorials on the main workshop theme and a few seminars that overview more advanced research topics, still kept at an expository level. StaTalks are thus a great opportunity to become acquainted with the workshop main topic, as well as to share and update one's knowledge on the interface of Statistical research in an easy and informal atmosphere.

The topic of this fifth edition will cover many areas of research currently undergoing at the Department of Statistical Sciences of the University of Padua ranging from methodological statistics to demography.

Registrations, as in the past StaTalk events, is free of charge but mandatory.

Additional information, can be found at the workshop page [stataalk.stat.unipd.it](http://stataalk.stat.unipd.it)

### **SIS 2018 and Stats Under the Stars 4**

The 49th meeting of the Italian Statistical society will be held in Palermo on the summer 2018. **Stats Under the Stars 4** (SUS4) will be a satellite event of the SIS meeting. SUS is whole night event for young statisticians, where different teams of young statisticians will compete in the analysis of a shared dataset. Further information on this and related events will come in the next newsletter.
